A summary of your choices - taking on small highways amenities tasks

The sorts of highways activities that you could get involved in:

• Consider walking routes	 Licence to Plant may be required Confirm landownership Check buried cables/pipes (if deep planting) Consider wider issues of different methods of weed control Consider regulations regarding nesting 	 Confirm ownership Confirm status (i.e. check if "listed") Consider aesthetics 	 Consider potential of exposing/creating additional defects Consider necessary disposal of materials 	 Confirm ownership Consider necessary disposal of materials
---------------------------	---	---	--	---

You should also consider where your parish is, so you know what safety advice you should take on-board...

Urban or rural road with low volumes and speeds	Urban or rural road with moderate traffic volumes and speeds	Urban or rural road with high traffic volumes and speeds
How you can do the activities safely		
 Consider your own safety and of the activity on pedestrians passing traffic. If in any doubt speak to your CHLO site specific advice and guidance. 	 Consider your own safety and the impact of the activity on pedestrians and any passing traffic. Volunteers should only work from the footway with a safe distance between them and live traffic. Consider employing a qualified contractor to cover any requirements for booking road space, traffic management, permit to dig etc. Seek guidance from your CHLO to help identify and mitigate any site specific concerns. 	 Consider employing a qualified contractor to cover the necessary requirements to book road space, install traffic management, apply for a permit to dig etc. Inform your CHLO of your intentions to identify and mitigate concerns.
